Question 1

1 / 1 pts

Which of the following is NOT a disadvantage of the waterfall model?

In the waterfall model, major mistakes may not be detected until the working program is reviewed

The waterfall has a sequential workflow, and real projects rarely follow a sequential workflow

The waterfall model requires constant customer communication, and it is difficult for the customer to commit to this

The waterfall works best when customers state all requirements up front, and it is difficult for customers to do this

Correct!

Question 2**0 / 1 pts**

Pressman and Wikipedia present two different versions of the Unified Process Model. In which version(s) of the Unified Process model is the following statement true: "All framework activities are involved to a lesser or greater degree in each phase."

☐ This is not true in either version of the Unified Process model

☒ This is true in both versions of the Unified Process model

☐ This is true only in Pressman's version of the Unified Process model

☐ This is true only in the traditional (Wikipedia) version of the Unified Process model

You Answered

Correct Answer

Question 3**1 / 1 pts**

If you release software too soon, you risk failure because you have too many defects in your product; if you release software too late, you risk failure because...

☐ you spend too much money on your product

☐ your bugs become too expensive to fix

☒ your competitors beat you to market

☐ your software becomes hard to maintain

Correct!

Question 4**1 / 1 pts**

According to Barry Boehm, which of the following is NOT true about the Spiral model?

Correct!

- ☒ the spiral is simply a sequence of waterfall increments
- ☐ the spiral model guides a team to adopt elements of one or more process models
- ☐ the spiral model is iterative in nature
- ☐ the spiral model is risk-driven

Question 5**0 / 1 pts**

Which of the following best explains the term process flow?

Correct Answer

- ☐ Describes how activities repeat before proceeding to the next.

☐ Describes how the framework activities and the actions and tasks that occur within each framework activity are organized with respect to sequence and time.

Not Answered

- ☒ Describes the execution of each of the five framework activities in sequence, beginning with communication and culminating with deployment.

Describes the execution of one or more activities in parallel with other activities.
